## **DETAILED ACTION**

1. In response to the Amendment filed on April 29, 2005, claims 1-43 and 48-63 have been cancelled, claims 44-47 and the newly added claims 64-69 are pending.

## Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 44-47, drawn to the method for heat treating a spring, classified in class 148, subclass 580.
  - II. Claims 64-69, drawn to the method for displaying haptic information, classified in class 434, subclass 114.
- 3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are prima facie independent and distinct inventions due to their recitations of distinct and specific structures. Invention I is directed to the method steps for heat treating a spring. Invention II is directed to the structural method steps for displaying haptic information. Because these inventions are distinct for the reasons given above and has acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 10/748,742
